Product : **Intelligent Security System.**
Project   : Intelligent Fire Detection & Monitoring System

Ground   Zero Viewer Pvt. Ltd. was established in the year 2012 by the promoters Mandar Salkar & Varun Sahasrabudhe at Innovation & Entrepreneurship Development Centre, Sardar Patel Institute Of Technology, Andheri (West), Mumbai. Our product is regarding security system for commercial establishments, termed as "Intelligent Fire Detection & Monitoring System." which helps the commercial/ non-commercial buildings to detect the occurrences of threats like fire. The framework of the project is based on the security needs of buildings. In this product, a 2-Dimensional view of the entire building structure shown on a single panel will be connected to the main threat detection sensor which will provide emergency support for the rescue teams like Fire Brigade, armed forces etc.

The affected area will get displayed as soon as the sensor deployed in that area detects the threat like smoke or fire. All the entrances- regular as well as emergency, location of safeguards such as fire extinguisher etc, dimensions of corridors & other details will get displayed on the display panel which will help rescue teams to understand & plan their rescue operation in no time.
